DETAILED ACTION

The instant Office Action is in response to the decision rendered by the Board of Patent Appeals and Interferences (BPAI) (filed 14 November 2007) affirming the Examiner, *in part*. PROSECUTION IS HEREBY REOPENED. The new rejections are set forth below. To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) initiate a new appeal by filing a notice of appeal under 37 CFR 41.31 followed by an appeal brief under 37 CFR 41.37. The previously paid notice of appeal fee and appeal brief fee can be applied to the new appeal. If, however, the appeal fees set forth in 37 CFR 41.20 have been increased since they were previously paid, then appellant must pay the difference between the increased fees and the amount previously paid.

A Supervisory Patent Examiner (SPE) has approved of reopening prosecution by signing below:

MATTER OF RECORD

The Board Decision was made with respect to the examination of SEQ ID NO:11. SEQ ID NO:11 is a fusion protein. Young et al. (Genomics, 7(4):491-502, August 1990); (Medline: 90353945; PubMed: 1974876) made of record in the previous Office Action (21 August 2003) was the closest prior **but is NOT considered prior art** because Young et al. fail to teach a sequence which is 100% identical to a sequence comprising

Art Unit: 1647

SEQ ID NO:11. See the sequence alignment between Young et al. and instant SEQ ID NO:11 (Appendix C).

In view of the allowability of SEQ ID NO:11, the search was expanded to include all SEQ ID NOs: recited in the instant claims. The full breadth of the claims has been examined on the merits.

Status of Application, Amendments and/or Claims

The amendment post BPAI decision (filed 14 November 2007) has been entered in full. Claims 1, 2, 5 and 6 are pending and under examination.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 5 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Hoyer et al., US Patent No. 5,304,496.

The instant claims are drawn to an active peptide fragment comprising an amino acid sequence of recited SEQ ID NOs. The instant claims recite the limitation, “comprising” and thus reads on open claim language. Hoyer et al. teach a protein

Art Unit: 1647

sequence which is 100% identical to instant SEQ ID NO:7 and SEQ ID NO:9. See Appendices A and B, respectively. See Hoyer et al., columns 19-20.

Because Hoyer et al. teach a protein sequence that is 100% identical to the sequence of instant SEQ ID NO:7 and SEQ ID NO:9, the protein of Hoyer et al. must have the functions recited in the instant claims (i.e. peptide binds to integrin receptor, increases cell attachment and cell spread). A compound and all of its properties are inseparable (*In re Papesch*, 315 F.2d 381, 137 USPQ 43 (CCPA 1963)).

Conclusion

No claims are allowed.
